The Presentation - The presentation should demonstrate how well you applied the principles of technology. It should contain the following 10 mandatory pages, rest you can include other slides as well as per your project:

Slide 1: Student Details

- Name: [Your Name]
- SkillsBuild Email ID: [Your SkillsBuild Email ID, the email id with which you are registered on SkillsBuild under **DGT**]
- College Name: [Your College Name]
- College State: [State where your college is located]
- Internship Domain and Internship Start and End Date: [Domain of your internship]/[Start Date - End Date of your internship]
- Please insert your candid picture here on slide. Ensure that your candid picture is professional and appropriate for the context of the presentation. It should be clear and visually appealing.

Slide 2: Problem Statement/Project Topic

 - Clearly state the problem statement or topic of your project.

Slide 3: Agenda

- Provide a clear agenda for your presentation, outlining the main sections or topics you will cover.

Slide 4: Project Overview

 - Provide a brief overview of your project, explaining its purpose, scope, and objectives.

Slide 5: Who are the End Users

- Identify and describe the target audience or end users of your project. Explain their characteristics, needs, and how they will benefit from your solution.

Slide 6: Your Solution and its Value Proposition

- Present your solution to the problem or topic identified earlier. Explain how your solution addresses the needs of the end users and the value it brings.

Slide 7: How did you customize the project and make it your own?

- Highlight the unique aspects or features of your solution that set it apart from the existing one. Explain what makes it innovative, creative, or remarkable.

Slide 8: Modelling

- Showcase the modeling techniques, methodologies, or frameworks you applied in your project. Describe how you utilized technology principles to develop your solution.

Slide 9: Results

- Present the outcomes or results of your project. This can include quantitative data, qualitative feedback, or any other evidence of the effectiveness or success of your solution.

Slide 10: Links

- Provide links or references to any relevant resources, documents, or websites associated with your project. These could include GitHub code repositories, research papers, or additional materials for further exploration.

[Additional Slides]

- You can include additional slides as needed to provide more detailed information, visuals, or demonstrations related to your project. These could include diagrams, charts, screenshots, or any other supporting materials.

Remember to customize the content on each slide based on your specific project and internship experience. Make sure to deliver a clear and concise presentation that effectively showcases your application of technology principles and the value of your solution.

_____

The Video (optional):

We have an exciting opportunity for you to showcase your projects and be featured on Edunet's social media channels. In addition, you have a chance to be recognized by the esteemed IBM team.
- Video Length: Maximum 5 minutes
- Video Orientation: Landscape Mode (horizontal)

Start your video by introducing yourself and sharing how the SkillsBuild has contributed to your project and skillset development. Highlight the valuable resources, guidance, or support you received through SkillsBuild that helped you in your project journey.

In your video, you will have the opportunity to explain your project in a clear, concise, and engaging manner. Make sure to highlight the key aspects, innovative solutions, and the impact your project has achieved. Remember, your goal is to captivate the viewers and leave a lasting impression.

Here are some tips to help you create an outstanding video:

1. **Plan Your Content**: Outline the main points you want to cover in your video. Prepare a script or key talking points to keep your presentation organized and focused.
2. **Visual Aids**: Utilize visual aids, such as slides or screen recordings, to enhance your explanation. Visuals help convey information effectively and engage your audience.
3. **Practice, Practice, Practice:** Rehearse your presentation beforehand to ensure a smooth and confident delivery within the time limit. Pay attention to your tone, pace, and body language to appear confident and engaging.
4. **Quality and Clarity:** Ensure your video has good audio and visual quality. Find a quiet location with proper lighting, and use a clear and audible voice.
5. **Unique Touch:** Add your own creative touch to the video. Consider incorporating elements that make your presentation memorable and stand out from the crowd.

Finally, conclude your video with a heartfelt thank-you note, expressing gratitude to the SkillsBuild platform, your mentors, or anyone who supported you throughout your project journey. **(You can simply mention Edunet team or IBM team, do not mention any names in video)**

Remember, this is your opportunity to leave a lasting impression on the viewers and potentially get recognized by IBM.
